CRAFT BEVERAGE LABEL PRODUCTS

Beer, Cider & Gourmet Soda

Labels have the ability to set your brand apart from the rest of the competition on the shelf or in the cooler. Customers perceive value of a product through its packaging. Make an impact with the label material you choose! Bottle or can labels are available in coated and uncoated paper, film and eco-friendly materials.

CRAFT BEVERAGE LABEL PRODUCTS

Experts in "What If..."

At Wausau Coated, we offer Craft Beverage Label materials that include wet strength, PCW content, FSC® certification, even wood veneer. Craft breweries use unique and high quality ingredients to develop outstanding beverages, we can provide label materials that are as unique and convey your brand on the outside of the bottle or can.

Facestock Materials

Craft beer labels, like the liquid that is craft beer, have evolved into an artform of sorts. The best way to differentiate your brand from others is to design a memorable label. Using a unique label facestock material can help brand owners achieve that goal.

Label stock materials to consider include:

- Paper stocks with wet strength
- Textured paper stocks
- Colored paper stocks; natural or black
- Wood veneer
- Environmentally friendly
- Foil
- White or clear films
- Metalized film
- Holographic film

Continue the experience of craft beer or gourmet sodas with smooth or textured label materials. Pressure sensitive labels can be used on cans or bottles. The combination of a unique label material, intense graphics and a distinctive die line can create an experience before the container is even opened.

Adhesive Materials

Functionality of a label is key; the label adhering to the bottle or can is critical. The initial tack, or the immediate holding power of the label, on contact is important in the application process as well as the time required for the label to achieve ultimate adhesion. When labeling craft beverages, the application can be a wet or a dry process. We have adhesives that can perform in these environments. Match your process within the wet or dry category and you will find a quick and easy label option.

Wet Applications

Wet application can be a very demanding process. The label must adhere quickly and remain intact while continuing down the bottling line. Wausau Coated offers two wet application adhesive options.

P-890

An aggressive rubber based permanent adhesive with excellent initial tack and ultimate adhesion. P-890 performs well when applied to moist or wet surfaces. It offers excellent die cutting and converting properties.

PCT-524

This adhesive performs well when applied to moist or wet surfaces. It is a very aggressive cold temperature permanent adhesive with great cold flow properties.

Dry Applications

Dry application is typically an easier process. Once labeled, the bottle will be placed in a cold or moist environment so it is important that the adhesive settles and holds the label on the can or bottle.

H-318

This adhesive performs best when applied to dry surfaces. H-318 is the ideal choice for high-end beverage, beer and spirits, with improved resistance to moisture and humidity after bottling. It was engineered to provide excellent high initial tack and quicker label adhesion onto glass while providing functional converting performance on an array of face stocks. It is the adhesive of choice for textured and embossed/debossed labels that will ultimately be exposed to moisture and humidity by resisting and limiting bubbling and wrinkles.

AT-2060

An aggressive all-temp emulsion acrylic permanent adhesive with good room temperature and excellent cold temperature performance. It exhibits high initial tack and adhesion when applied to dry surfaces, even on the most textured and hard-to-label substrates. Designed with good die-cutting and stripping properties.

CP-300

Performs best when applied to dry surfaces, CP-300 is a clear permanent emulsion acrylic with excellent clarity and good initial tack. Excellent choice for beverage bottles.

Experts in “What If...”

To some “What If” is an anxiety-producing endeavor because of endless possibilities, while others are excited with the challenge.

At Wausau Coated we have a passion for “What If”. We work to give you choices and options, where you did not believe they existed.

Together we can develop your own specialized solution.

Wausau Coated Products is a leading manufacturer of pressure sensitive roll labelstock. Committed to providing excellent service and high quality products, Wausau Coated understands that in today's business environment superior quality, quick delivery times and cost efficiencies are critical to success.

Our assortment of products fulfills these requirements by providing brand owners of craft beverage with a broad selection of paper and film substrates. We continue to expand our offerings and work closely with the OEMs (Original Equipment Manufacturers) to ensure that our products will consistently perform to your expectations.

Stocked Products

Wausau Coated features a line of stocked pressure sensitive products for Craft Beverage Label applications. All of our stocked items are available for immediate shipment with a low minimum order quantity. Trial rolls are available and recommended to determine the suitability of any product for a particular application.

Custom Products

In addition to our stocked items, we can mix and match many of our facestocks with various adhesive technologies and liner options. Our knowledgeable sales team and technical staff rise to any challenge related to adhesive-based label materials to quickly turn a concept into a product, delivering a solution that will give you the competitive advantage.

Share your “What If” challenge with us and see how we can help you.
