

Pressure Sensitive

Herma Stock- Mexico

STRONGER TOGETHER

QUALITY

For more than 110 years, customers have been able to put their trust in HERMA's quality factor "Made in Germany". We will continue to stick with this location in the future.

INNOVATION

Our production takes place in one of the most advanced plants worldwide. Thanks to multi-layer coating technology, we are able to simultaneously apply different adhesive layers.

COMPETENCE

A family-owned business for more than 110 years, we set great store by sustainable customer relations.

FACESTOCK AND ADHESIVE COMPARISON MATRIX

POLYETHYLENE (PE) FILMS

HERMA's polyethylene films—available in white, silver, and transparent—offer a glossy, flexible, and squeezable surface ideal for premium product labeling. With excellent printability and high resistance to moisture, oils, and soaps, these films are perfect for curved surfaces and squeezable packaging. Their compatibility with food contact regulations and recyclability on PE containers make them a sustainable and versatile choice for cosmetics, hygiene, and food & beverage applications.

SEMI-GLOSS PAPERS

HERMA's semi-gloss papers, including HERMAextracoat and HERMAcoat, deliver outstanding print quality across traditional and digital printing methods. These FSC®-certified papers are ideal for high-quality, multicolor labels and support thermal transfer and laser printing. With strong adhesion and excellent die-cutting performance, they are a reliable, cost-effective solution for food labeling and general-purpose applications.

METALIZED PAPER

HERMASilver met is a bright, metallized label paper that combines a luxurious, high-gloss finish with excellent printability and durability. Designed for decorative and premium product labeling, it performs exceptionally well in cold and moist environments, making it ideal for bottle and cosmetic labels. FSC® certified and food-safe, it adds a premium touch while maintaining functionality and sustainability.
